TIGER TALES

Principal's Message

Dear Parents and Students,

I encourage all of you to attend the first PTP meeting of this school year. The meeting is on Monday September 21st. The general meeting begins at 6 pm in the Sanctuary. Students are welcome to attend although we do ask parents to please try to keep them quiet during the general meeting. As a reward, students who attend, with parents will be given a FREE NUTS DAY PASS and I will provide an ice cream party to the class with the greatest percentage of students attending. Attendance at these meetings also qualifies towards your volunteer hours. This PTP meeting is designed to be an informative meeting, an election will be held to establish the new Board. If anyone is interested in serving on the Board, please give me your information by Friday September 18th. Teachers will highlight before and after school activities and clubs that your child might be interested in joining. Please come and be part of this organization and help plan future activities for your child.

If anyone has any uniforms in good condition, that are now too small, we appreciate if you could turn them into the office so that we can put them in Tiger Store for other families to purchase at a nominal price. All monies collected go towards replenishing the Store so that all students can benefit.

It is important for children to be in school for the full day. Federal Law states that children from kindergarten up must be in full time education. If you need to make

appointments for medical or any other reasons, try to make them outside school hours. Children arriving late or leaving early are missing out on valuable tuition time as well as possibly disrupting the class routine. Remember, school starts at **8:00am** and a student is identified as being tardy if they are not in their classroom by **8:15am**. Dismissal is **2:50pm** every day except Wednesday when it is **1:30pm**.

PreK-4 teachers Mrs. Aldrich & Mrs. Bain are in their second year involved in a program called STEM (Science, Technology, Engineering, Mathematics) which is through the Orlando Science Center. STEM education is an approach to learning combining multiple academics subjects, focusing on real world lessons. Its about students applying Science, Technology, Engineering and Mathematics that make connections between, school, community, work and the world around them. While moving students forward, creating stronger problem solvers, more creative innovators to lead the global economy.

Remember that there will be NO Afterschool sports next week.
